

The New American Home 2017

Phantom's retractable wall screens provide the perfect solution for oversized sliding glass wall systems

LOCATION: Orlando, Florida
STYLE: Contemporary/International
DESIGNER: Phil Kean Design Group
PRODUCT: Phantom retractable wall screens
MESH TYPE: Fiberglass 18/14 mesh
NEED:

As part of this innovative home design, the rooms are equipped with oversized sliding glass wall systems that allow the homeowner to enjoy an expansive view and easily access the courtyard and pool area. The designer wanted a solution that would keep this space open to the outdoors, allowing cool air to flow through the home without being bothered by bugs.

SOLUTION: Phantom Screens was able to provide the perfect solution to accommodate the oversized sliding glass wall systems with retractable wall screens. Using two units, these screens can cover large openings up to 24 feet wide that seamlessly blend in with the home's design. When not in use, the screens retract completely into their housing allowing the homeowner to enjoy their expansive view.

*“Phantom Screens is a class company;
Their quality is superb. I was thrilled
when they said they would do it [because]
I knew it was going to be great.”*

*- Phil Kean

OVERVIEW

Produced and presented by the National Association of Home Builders, the New American Home is a premier show home, featuring the latest innovative products for the future of home building and design.

Located near the very prestigious Lake Nona Golf & Country Club, the 2017 New American Home showcases Phantoms' new retractable wall screens for multi-panel, sliding, and folding glass wall systems. The designer wanted every room to open to the outside with large sliding glass walls and needed a way to let the breeze in from the lake while keeping the bugs out.

APPLICATION HIGHLIGHTS

Complements any home

Phantom's retractable wall screens retract horizontally and completely disappear out of sight when not in use. This way the screens don't detract from the design of the home.

Protection from the sun and the bugs

The retractable screens feature Phifer 18/14 insect mesh, with 58% openness and 40% sun/UV protection, keeping the heat and the bugs out while still maintaining the views.

Easy operation with secure closure

Phantom's retractable wall screens feature a thumb latch integrated in the handle for quick release, mesh completely secured in track to prevent unwanted pests, and customizable stopping points for easy in and out access.

PRODUCT FAST FACTS
